SUMMARY

Full-Stack Node/React Web Application Developer, Computer Science MSc, designed and built web apps currently used by 5000+ people. I enjoy all parts of building online projects, from the initial idea and design to development to marketing, but my main focus is creating interactive apps with React and related technologies. I'm also passionate about Machine Learning, Writing, and Digital Art. Looking for opportunities to work on interesting projects with friendly people, to grow as a developer, and to improve my skills.

SKILLS

Frontend: HTML/CSS/JS, TypeScript, React/Redux, Sass, Bootstrap/Foundation, jQuery.

Backend: Node/Express, Next.js, Gatsby, Python/Django, MongoDB/Postgres, GraphQL.

Tools: Git, Linux server, Nginx, SQL, Webpack, Docker. Emacs.

Design: UI/UX Design, Figma, Affinity Designer, Photoshop, 3D Software and Digital Art.

Soft skills: Product Management, Internet Marketing, Technical Writing, SEO.

Other: Machine Learning (scikit-learn, pandas, keras, etc.), Game Development (Godot).

EDUCATION

University of Birmingham, Computer Science MSc (September 2020 - September 2021).

Machine Learning Bootcamp. Countless online courses, and building personal projects.

PROJECTS

- **Writing Streak** (writingstreak.io)
A Node/React/Redux app that helps writers to be more productive and develop a consistent writing habit. **4000+ users** from organic growth, just word of mouth.
- **Nulis** (nulis.io)
A mind-mapping tool for writers, an app for collecting and organizing knowledge. Built with Node/React/Redux. **1300+ users**.
- **Lumiverse** (lumiverse.io)
Discovery platform for educational videos built with Python and Django. Old project, had **37,000 visitors per month** at its peak.
- **Fiction Hub** (fictionhub.io)
Web fiction publishing platform built in Python/Django. **1000+ users**.
- **Helix** (helix.startuplab.io)
A Node/React habit tracking app that helps people to develop a daily routine.
- **Webacademy** (webacademy.io)
Python/Django website, a place to discover the best webdev tutorials and courses.
- **Mirage** (playmirage.io)
A roleplaying game and adventure publishing platform built with Gatsby.
- **Digital Mind** (digitalmind.io)
A blog where I post my Machine Learning notes.
- **Godot Academy** (youtube.com/c/GodotAcademy)
My gamedev projects and tutorials about Godot Game Engine and Digital Art.
- **Digital Art** (artstation.com/lumenwrites)
2D and 3D Digital Art I'm creating.
